1. Executive Summary

1.1 Problem Statement

Employees need access to wellness and fitness content through live sessions, on-demand videos, and offline activities. Currently, there is no centralized platform for hosting live webinars, managing event registrations, or providing on-demand wellness content within the Habit Health ecosystem.

1.2 Solution Overview

- Three event types: Live Webinars (via daily.co), Recorded Videos (VOD), and Offline Events
- User registration flow with capacity limits and confirmation emails
- Live webinar experience with chat, raise hand, and host controls
- Recurring event support (Daily, Weekly, Monthly schedules)
- Admin console for event creation, management, and analytics
- CUG + User Group based eligibility (consistent with other modules)
- Multi-channel notifications (Email, Push, In-app)

2. Scope

2.1 Included in This Release

Feature	Description
Live Webinars	Real-time video events via daily.co with host/participant controls
Recorded Events (VOD)	On-demand video content organized by category
Offline Events	Physical events with venue details and registration
Recurring Events	Daily, Weekly, Monthly scheduling support
Registration System	Capacity limits, registration window, cancellation
Host Controls	Start/end, mute, raise hand approval, screen share, record
Co-hosts/Panelists	Multiple hosts per event
Event Categories	Organization by topic and type
Admin Analytics	Registration, attendance, engagement metrics
Notifications	Email, Push, In-app for all event actions
Timezone	IST (Indian Standard Time) only

2.2 Explicitly Out of Scope

Feature	Notes
Hybrid Events	Events are either Live, Recorded, OR Offline — not combined
VOD Progress Tracking	No "resume where you left off" feature
VOD Rewards	No Care Coins for watching videos (configurable later)
Offline Check-in	No digital attendance verification
Private/Invite-only Events	All events visible to eligible users
Multi-timezone Support	IST only
Event Rewards	Configurable in future phase

3. Event Types

3.1 Event Type Comparison

Attribute	Live Webinar	Recorded (VOD)	Offline
Registration Required	Yes	No	Yes
Capacity Limit	No limit	N/A	Yes
Time-bound	Yes (scheduled)	No (on-demand)	Yes (scheduled)
Host Required	Yes	No	No (organizer)
Recording	Optional (host)	Pre-uploaded	N/A
Interaction	Chat, Raise Hand	View only	Physical
Location	Virtual (daily.co)	Cloud storage	Physical venue

3.2 Live Webinar

Real-time video streaming events hosted via daily.co. Users must register before the event and can join anytime between the scheduled start and end time. Supports recurring schedules (e.g., Monday to Friday, 7 AM to 8 AM).

3.3 Recorded Event (VOD)

Pre-recorded video content uploaded to cloud storage and published by admin. No registration required — users can watch on-demand. Organized by topic (Fitness, Nutrition, Mental Health) and type (Workout, Talk, Tutorial).

3.4 Offline Event

Physical events such as workshops, fitness classes, or health camps. Users register through the app and attend at the specified venue. Includes venue details, map link, capacity, and contact person information.

4. Eligibility & Access Control

Event visibility follows the same dual-condition model as other Engagement modules. Both CUG and User Group conditions must be satisfied for a user to see an event.

Rule	Behavior
CUG assignment required	Admin must assign at least one CUG
User Group assignment required	Admin must select User Groups

User in multiple User Groups	User sees events from ANY of their groups
Non-eligible user	Event is hidden completely
Lost eligibility after registration	Can still view event details; cannot re-register

5. User-Side: Event Discovery

5.1 Navigation

Users can access events from multiple entry points: Home page widgets, Play/Engagement homepage, and the dedicated Events section in navigation.

5.2 Event Listing Page

- Tab filters: Ongoing | Upcoming | Past
- Search by keyword
- Filter by category/type
- Event cards showing: Title, Date/Time, Type badge, Registration status

5.3 Event Card Display

Element	Description
Banner Image	Event thumbnail/poster
Title	Event name
Type Badge	"Live" / "Recorded" / "Offline"
Status Badge	"Live Now" / "Upcoming" / "Event Full" / "Registered"
Date & Time	Scheduled date and time (IST)
Category	Topic tag (e.g., "Fitness", "Mental Health")

5.4 Event Detail Page

- Banner image(s)
- Title and description
- Event type and category
- Date, start time, end time
- Host/speaker information (for Live)
- Venue details (for Offline)
- Registration button or status
- Capacity indicator (if applicable)

6. User-Side: Live Webinars

6.1 Registration Flow

1. User views Live Webinar event details
2. User taps "Register" button
3. System validates: eligibility, capacity, registration window
4. On success: Confirmation email sent, event added to user's calendar
5. User can cancel registration anytime before event starts

6.2 Joining the Webinar

Rule	Behavior
Join window	Between event start time and end time
Before start time	"Join" button disabled; countdown shown
During event	"Join" button enabled; opens daily.co room
After end time	Event marked as "Ended"; Join unavailable
Late join	Allowed anytime during the event window
Leave and rejoin	Allowed; user can exit and come back

6.3 Recurring Events

For recurring events (e.g., Monday to Friday, 7 AM to 8 AM), users register once and can join during any scheduled occurrence. The "Join" button is enabled only during active time windows.

6.4 In-Webinar User Controls

Control	Description
View Video	Watch host/speaker video stream
View Audio	Listen to host/speaker audio
Chat	Send text messages visible to all participants
Raise Hand	Request to speak; host must approve
Leave	Exit the webinar (can rejoin later)

6.5 Raise Hand Flow

1. User taps "Raise Hand" button
2. Host sees notification of raised hand
3. Host approves or rejects the request
4. If approved: Host enables user's microphone, camera, or both
5. User can now speak/appear on stream
6. Host can disable user's mic/camera at any time

Note: The host controls which devices (mic, camera, or both) are enabled for the user. Users cannot self-enable their mic/camera without host approval.

7. User-Side: Recorded Events (VOD)

7.1 Access

Recorded events are available on-demand without registration. Users can browse, search, and watch videos at any time. Videos are organized by both topic and type.

7.2 Video Categories

Category Type	Examples
By Topic	Fitness, Nutrition, Mental Health, Yoga, Meditation
By Type	Workout, Talk, Tutorial, Interview, Guided Session

7.3 Video Player

- Play/Pause controls
- Seek bar (progress slider)
- Volume control
- Fullscreen toggle
- Playback speed (0.5x, 1x, 1.5x, 2x)

Note: Watch progress is not tracked in this release. Users cannot "resume where they left off."

8. User-Side: Offline Events

8.1 Event Information

Field	Description
Venue Name	Name of the physical location
Address	Full address of the venue
Map Link	Link to Google Maps or similar
Capacity	Maximum number of registrations
Contact Person	Organizer name and contact details
Date & Time	Event schedule (IST)

8.2 Registration

Users register for offline events through the app. Registration follows the same flow as Live Webinars: validate eligibility, check capacity, send confirmation email.

8.3 Attendance

Digital check-in is not required in this release. Attendance is verified physically at the venue.

9. Registration Flow

9.1 Registration Rules

Rule	Behavior
Registration window	Defined by admin (can differ from event date)
Before window opens	"Registration opens on [date]" message
After window closes	"Registration closed" message
Capacity reached	"Event Full" badge; registration disabled
Already registered	"Registered" badge; "Cancel Registration" option

9.2 Registration Validation

- User must be eligible (CUG + User Group)
- Registration window must be open
- Event capacity must not be full
- User must not be already registered

9.3 Registration Cancellation

- User can cancel registration anytime before event starts
- After event starts: Cancellation not allowed
- Cancelled registration releases capacity for others
- Cancellation confirmation sent via email

9.4 Confirmation & Reminders

Notification	Timing	Channels
Registration Confirmation	Immediately after registration	Email, Push, In-app
Event Reminder	Before event (configurable)	Email, Push, In-app
Event Starting Now	At event start time	Push, In-app

10. Host Controls (Live Webinars)

10.1 Host Assignment

Admin assigns host(s) during event creation by entering their email address or user ID. When the host logs into Habit Health, they can access and manage their assigned webinars.

10.2 Host Capabilities

Control	Description
Start Stream	Begin the live webinar (enables user join)
End Stream	End the webinar for all participants
Mute All	Mute all participants at once
Approve Raise Hand	Allow user to speak
Reject Raise Hand	Deny user request to speak
Enable User Mic	Turn on specific user's microphone
Enable User Camera	Turn on specific user's camera
Disable User Mic/Camera	Turn off user's mic or camera
Remove Participant	Kick user from the webinar
Share Screen	Share host's screen with participants
Pin Speaker	Highlight specific speaker for all viewers
Start Recording	Begin recording the session
Stop Recording	End recording

10.3 Co-hosts & Panelists

Multiple hosts can be assigned to a single event. Co-hosts have the same controls as the primary host. Panelists are speakers who can present but may have limited moderation controls.

10.4 Recording

- Host chooses whether to record (not automatic)
- Recording is available immediately after webinar ends
- Admin must publish the recording for users to access
- Published recordings are visible to all eligible users

- Recordings do not expire (available until unpublished)

11. Admin-Side: Event Management

11.1 Event Creation Fields

Field	Required	Applies To
Title	Yes	All
Description	Yes	All
Banner Image	No	All
Event Type	Yes	All (Live/Recorded/Offline)
Category/Tags	Yes	All
CUG Assignment	Yes	All
User Group Assignment	Yes	All
Date	Yes	Live, Offline
Start Time	Yes	Live, Offline
End Time	Yes	Live, Offline
Host Email/User ID	Yes	Live
Co-hosts	No	Live
Capacity	No	Offline (slots)
Registration Start Date	Yes	Live, Offline
Registration End Date	Yes	Live, Offline
Venue Name	Yes	Offline
Venue Address	Yes	Offline
Map Link	No	Offline
Contact Person	No	Offline
Video File	Yes	Recorded

11.2 Recurring Event Configuration

Frequency	Description
Daily	Event occurs every day at specified time

Weekly	Event occurs on selected days each week
Monthly	Event occurs on specified date each month

Example: A yoga session recurring Monday to Friday, 7:00 AM to 8:00 AM. Users register once and can join during any scheduled occurrence.

11.3 Event Status

Status	Description
Draft	Event saved but not visible to users
Published	Event visible and open for registration/viewing
Unpublished	Event hidden from users (can be republished)

11.4 Edit After Publish

All event fields can be edited after publishing. Changes take effect immediately. If critical changes are made (date, time), admin should notify registered users.

11.5 View Registrations

Admin can view the list of registered users for any event. Export to CSV is supported for offline tracking or reporting purposes.

11.6 Send Announcements

Admin can send manual notifications to all registered users. This can be used for event updates, reminders, or important announcements.

12. Notifications

12.1 Notification Types

Notification	Trigger	Channels
Registration Confirmation	User registers for event	Email, Push, In-app
Event Reminder	Before event (admin configurable)	Email, Push, In-app
Event Starting Now	Event start time reached	Push, In-app
Event Cancelled	Admin cancels event	Email, Push, In-app
Recording Available	Admin publishes recording	Email, Push, In-app
Manual Announcement	Admin sends notification	Email, Push, In-app

12.2 Notification Channels

Channel	Description
Email	Sent to user's registered email address
Push Notification	Mobile device notification
In-app Notification	Notification center within Habit Health app

13. Attendance & Analytics

13.1 Live Webinar Tracking

Metric	Description
Who Joined	List of users who entered the webinar
Join Time	Timestamp when each user joined
Duration Watched	Total time each user spent in webinar
Dropped Off	Users who left before event ended
Stayed Till End	Users who remained until host ended stream

13.2 Admin Analytics Dashboard

Metric	Description
--------	-------------

Total Registrations	Number of users who registered
Actual Attendance	Number of users who joined
Attendance Rate	Attendance / Registrations percentage
Peak Concurrent Viewers	Maximum users at same time
Average Watch Time	Mean duration across all attendees
Chat Engagement	Number of chat messages sent

14. Technical Requirements

14.1 daily.co Integration

Live webinars are powered by daily.co video platform. Integration includes room creation, participant management, host controls, and recording functionality.

14.2 Video Storage

Recorded videos (VOD and webinar recordings) are stored in cloud storage. Admin uploads VOD content through the admin console and publishes recordings from completed webinars.

14.3 Platform Support

Platform	Support
Web	Full support for all event types
Mobile (iOS)	Full support including live webinar participation
Mobile (Android)	Full support including live webinar participation

14.4 Capacity

Event Type	Capacity Limit
Live Webinar	No system limit (based on daily.co plan)
Recorded (VOD)	N/A (on-demand)
Offline	Admin-defined capacity

14.5 Timezone

All event times are displayed and stored in IST (Indian Standard Time). Multi-timezone support is not included in this release.

15. Edge Cases & Error Handling

Edge Case	Expected Behavior
User tries to join before event starts	Show countdown; "Join" button disabled
User tries to join after event ends	Show "Event Ended" message
Registration window not open	Show "Registration opens on [date]"
Registration window closed	Show "Registration closed"
Event at full capacity	Show "Event Full" badge; disable registration
User already registered	Show "Registered" badge; offer cancel option
User cancels registration	Confirmation sent; capacity released
Host doesn't start webinar	Users see waiting screen; no timeout defined
User leaves webinar	Can rejoin if event still active
Network disconnection during webinar	User can rejoin; show reconnection UI
Admin unpublishes event	Event hidden; registered users notified
Admin edits event time	Changes applied; admin should notify users
Recording not published	Recording not visible to users
User loses eligibility	Can view but not re-register; existing registration valid

16. Acceptance Criteria

16.1 Event Discovery

- User can view event listing with Ongoing/Upcoming/Past tabs
- User can search events by keyword
- User can filter events by category
- Event cards display correct type and status badges
- "Live Now" badge shows for ongoing events

16.2 Live Webinars

- User can register for Live Webinar
- User can cancel registration before event starts
- User can join webinar during event window
- User can participate via chat
- User can raise hand to request speaking
- Host can approve/reject raise hand requests
- Host can enable user's mic/camera after approval
- Host can start and end the webinar
- Host can mute all participants
- Host can remove participants
- Host can share screen
- Host can record the session
- Recurring events allow join during any scheduled window

16.3 Recorded Events

- User can browse recorded videos without registration
- User can search/filter by category and type
- Video player has standard controls (play, pause, seek, volume, fullscreen)
- Videos are organized by topic and type

16.4 Offline Events

- User can view venue details (name, address, map link)

- User can register for offline event
- User can cancel registration before event
- Capacity limit is enforced

16.5 Admin

- Admin can create events of all types
- Admin can configure recurring schedules
- Admin can save events as draft
- Admin can publish/unpublish events
- Admin can edit all fields after publish
- Admin can view registration list
- Admin can export registrations to CSV
- Admin can send manual notifications
- Admin can view analytics (registrations, attendance, engagement)
- Admin can publish webinar recordings

16.6 Notifications

- Registration confirmation sent via Email, Push, In-app
- Event reminder sent before event
- "Event starting now" notification sent at start time
- Event cancellation notification sent to all registrants
- Recording available notification sent after publish

— End of Document —
